Jamie Rush understands what it takes to disappear because her parents taught her that long ago. Leveraging her knowledge of why and how people run from their own lives, Jamie has built a business based on bringing those in hiding back to answer for their actions. She takes pride in using her somewhat shady skills to work both inside and outside the law. When her estranged brother, Brian, calls and says his daughter is missing, Jaime initially turns down the case. Kristen has always been a bit wild, frequently dropping off the grid then showing up a few days later. But Brian swears this time is different, and even though Jamie vowed years ago to keep her conniving sibling at arm's length, she can't walk away if Kristen could be in real trouble. As Jamie begins digging into Kristen's life, she uncovers her niece's most guarded secrets. Uncovering the truth will put a target on Jamie's back and endanger the lives of those she loves.

This unique and comprehensive book presents a unifying paradigm for understanding operations, based in the belief that a large part of operations management is the design and management of business processes. The overall objective of the book is to demonstrate how managers can control process structure and process drivers to achieve desired business process performance. This framework is applied to understand which levels managers have to control: cycle time, capacity, inventory, and quality. Providing a conceptual and logically rigorous approach, Managing Business Process Flows discusses the subject in three steps: model and understand the process and its flows; study causal relationships between process structure and certain performance metrics; and formulate implications for managerial actions by filtering out managerial levers ("process drivers") and their impact on process performance. The book also identifies managerial levers, and establishes a connection between operational and financial measurements. An essential resource for all management professionals, especially Management Consultants specializing in operations and supply chains, Managers and VPs overseeing supply chains, and Plant Managers. ÿ
